## BILL COLMER GETS RESULTS!

## COLMER HELPS BRING "SPACE AGE" TO SOUTH MISSISSIPPI

BILL COLMER, "dean" of the Mississippi Congressional delegation in Washington, is pictured above during his May 23 inspection of the National Aeronautics and Space Administration (NASA) Mississippi Test Facility.

Location of this huge installation in Hancock and Pearl River Counties assured South Mississippi a very important role in the nation's space program... injected into the area... created 5000 new employment opportunities... and brought in future-oriented corporate citizens like Boeing, North American Aviation and General Electric—companies that can help South Mississippi grow in the years ahead.

This is one of many large projects in which Washington and South Mississippi must work together.

Bill Colmer, your man in Washington, knows who to deal with in which agency to get the job done for South Mississippi. The experience and respect he has built up during his years of honorable service is working now for you.

In the days ahead, South Mississippi progress can be stepped-up significantly by federal-local cooperative projects such as river basin development, port improvement, interstate highway completion, Gulf Coast Island development, major new facilities for higher education and research, and many others.

In each of these projects, South Mississippians will require their "man in Washington" to be knowledgeable and experienced in dealing with agencies of the United States government.

In each of these projects, you will need the proven effectiveness of veteran Congressman Bill Colmer.

Make sure "your man in Washington" is Bill Colmer.

DON'T GAMBLE WITH SOUTH MISSISSIPPI'S PROGRESS

VOTE TO KEEP COLMER IN CONGRESS

Submitted to and approved by William L. Stewart, Campaign Chairman.

My attention has been called to a letter from candidate Khayat dated May 16, to members of the board of supervisors throughout the district asking them to "work with your road crews to get the vote out on June 7th" and to support him.

All the members of the board of supervisors in South Mississippi are my personal friends and I am confident that most of them are also my political friends, but I would not think of embarrassing them with any such request.

Mr. Khayat is a paid employee of their association and they, therefore, are under no obligation to carry out requests from him.

## Violin maker to try Mississippi pine

To be or not to be a Strad? This has long been the question. Experts competent to make this important decision are just about as rare as are the priceless musical instruments conceived by the famed violin maker, Antonio Stradivari and his equally adept sons some 300 years ago.

The expert now in our midst is Reinhold Hahn, renowned throughout the entire South America not only as a violin maker, but also as a sculptor and designer of exquisite furniture.

He and his wife are guests for a month of their daughter, the well known violinist, Maria La Rosa, of the New Orleans Symphony and equally musical husband, Professor Marcel La Rosa, Director of North Bay Elementary School.

A German by ancestry he was taught his profession of violin making by German

craftsmen. Fine design and detailed carving, another business on which he has been engaged for 15 years, was more or less self learned. His violins, beautifully fashioned and intricately carved, made in only 12 days and sell from \$1,000 up. A set of bedroom furniture, consisting of bed, dresser, mirror and chest of drawers being constructed in the neighborhood of \$2,000. These, however, are collected items as he was able to do the mold to destroy the set to complete.

He has been a two week in his shop in his native Germany, St. Louis, Mo., all where he has been visiting for 40 of his 70 years. Speaking French, German and Portuguese he is an advocate of the "no never was law" and is not only a craftsman, but now is able to build a custom order with a very genuine reputation backed with a credit that gives one a sense of security a hard time.

This slight, impressively

decorated gentleman, possessing an apparent working source of energy, has not given without recognition to his own country. He is a member of the German Club, President of the St. Louis German Club, and a member of the St. Louis German Club, and a member of the St. Louis German Club.

# World's Most Powerful Rocket Readied For Moon Shot Tests

△ The NASA facility, with three giant test stands such as this one, is a dramatic illustration of the area's economic growth. When fully operational, the installation will employ some 3,000 engineers, technicians and support personnel, with an annual payroll of \$50 million.

△ Huge cranes swing a test model of the second stage of the Apollo Saturn V space vehicle into its test stand at NASA's Mississippi Test Facility in Hancock County. Total cost of the facility, now in its final phases of construction, will run over \$500 million.

Modern, multi-story buildings dominate the beautiful campus of the University of Southern Mississippi. An ambitious program of future physical expansion for the university is in the planning stage for an anticipated student body of 15,000.

## Where is it?

California? Cape Kennedy? No, it's in busy, booming southeast Mississippi. The National Aeronautics and Space Administration has located its 142,000-acre Mississippi Test Facility, the proving ground for rockets to land an American expedition on the moon. Once static firings are complete, the big boosters will go by barge to Cape Kennedy for final assembly and launching of the Apollo Saturn V moon rocket.

Just northeast of the Mississippi Test Facility, progress takes another step at the bustling University of Southern Mississippi in Hattiesburg. Here, the growing personnel needs of the space age, increased emphasis is given physical, biological and social sciences.

Southeast Mississippi's economic growth is the result of cities and towns throughout the 120,000-square-mile area served by The Southern Company. Contributing to this growth is the ample power provided by our companies.
